Marhoc Environmental Systems

P. O. Box 1209

Alvin, TX 77512

To whom it may concern:

The Purofirst division of John Fries Construction is a fire and water damage restoration specialty contractor in Sarasota, Florida. We have purchased a number of ozone machines from Marhoc, over the past four years.

All the machines have outperformed any other machine that we have used. The delivery of ozone is much easier with this machine due to the small diameter of the hose. Lack of cleaning for the ozone generator is a major plus. The folks at Marhoc have been most helpful with information regarding specific odor problems that we have addressed.

Sincerely,

John Fries, president, CR
